

## Dynamics Credentialed Professional Renewal Grace Period Extension

Dynamics Credentialed Professionals ([DCP's](#)) have the ability to demonstrate their continued proficiency with Microsoft Dynamics GP and renew their credential by passing the latest credentialing exams. Assessment content continues to be revised and updated to encompass the most current technologies and features of Microsoft Dynamics GP. Once a passing score on the latest exam has been achieved the credential is renewed for a term of 2 years.

Advanced Credentialed Professionals, DCP's that have earned more than one Dynamics Credentialed Professional mark, are able to renew ALL of their current credentials by earning a passing score on any one of the latest exams. Once a passing score has been earned, all of their current credentials will be renewed for a period of 2 years\* from the award date\*\*. Click on **View and Register for Exams** [HERE](#) to schedule your exam.

The GPUG Credentialing Council is providing existing DCP's the opportunity to remain in the program and on the website without interruption. **The Council has extended the renewal grace period for all Dynamics Credentialed Professionals to March 31, 2019.** During this grace period expiring professionals' names will NOT be removed from the website.

Existing professionals are asked to renew their credential during this grace period to remain on the website following the grace period.

The Council is also extending a **50% Off Credentialing Exams** coupon to all existing Dynamics Credentialed Professionals during this grace period.

Be sure you receive the recognition you earned and deserve by renewing your credential and [scheduling](#) an exam. You have until March 31, 2019 to renew your credential without interruption.

*\* If you are an Advanced Credentialed Professional with more than one mark, renewing just one of them will reset the renewal date for all of your credentials.*

*\*\* If your credential was earned before 1/1/2017 your awarded date is 1/1/2017*
