

By vote of the **GPUG Credentialed Council**, it has been decided that an extension of the two-year credentialing period will be granted for all credentialed professionals. The extension will be granted until ***December 31, 2018***, after which the standard two-year credentialing period will be back effect.

Credentialed Professionals looking to renew their certifications will need to provide evidence of their continued competency by successfully passing the most current credentialing exam. Exam content continues to be revise and updated to encompass the most current technologies and features of Microsoft Dynamics GP. We expect to have the latest exams launched prior to Dec 31st to ensure the current lineup of professionals has the ability to recertify themselves in a timely manner.
